

With over 500 invited guests from politics, business and society, the new building of the corporate headquarters of enercity, one of the most innovative companies in the energy industry, was opened with a ceremony. The lighthouse project of the state capital is a future-oriented building that offers optimal working conditions as well as an inspiring environment and is currently the largest passive house in northern Germany. Among the guests were Lower Saxony's Minister of Economics Olaf Lies, State Minister of the Environment Christian Meyer and Hanover's Lord Mayor Belit Onay. Congratulations were also extended by Lower Saxony's Minister President Stephan Weil.

The new building stands on a generous plaza that surrounds the entire building like a carpet. A representative water basin as a sky mirror as well as seating made of polished natural stone cushions form an inviting entrance. A tree grove of picturesquely growing, high crowns provides shade and complements the composition. The project results in a complete upgrade of the urban framework. The competition was won by Haas Cook Zemmrich STUDIO 2050 together with WES LandschaftsArchitektur. WES shareholder Wolfgang Betz was among the guests.

LandschaftsArchitektur

Mayor Felix Heinrichs and Dr. Gregor Bonin, City Director and Technical Councillor, officially opened the redesigned and enlarged Geropark on the lake stage. The varied supporting program included themed tours of the park, several music concerts, various games and a mobile theater. As an inner-city green space, the central Geropark forms urbanistic references to the nearby Sonnenberg, the Abteigarten and the Hans-Jonas-Park.

The redesign develops the park around the central area of the enlarged Geroweiher and at the same time accentuates important areas such as Geroplatz or the historic city wall. Diversely designed bank areas, water fountains as well as seating and walking steps along the 43 percent enlarged water surface create special recreational qualities in the immediate vicinity of the water. As a plaza-like entrance in keeping with the location, Geroplatz is integrated into the holistic park landscape. Long, illuminated seating elements and a perennial planting behind them emphasize the historical course of the old city wall. A variety of play and sports facilities for young and old complement the user offerings in the northwestern area, and new, stock-oriented pathways connect higher-level green and traffic structures.

**Flensburg Landscape Gardens**  
Opening 10/09/2023

With the ceremonial opening of the Flensburg Landscape Gardens on the nationwide Open Monument Day, the redesign of the Flensburg Landscape Gardens park and cemetery ensemble, one of the most important, historic green spaces in Schleswig-Holstein, which is in keeping with its status as a historic monument, comes to its crowning conclusion.

Dr. Robert Habeck, Vice Chancellor and Federal Minister for Economic Affairs and Climate Protection, Pelle Hansen, Deputy Mayor of Flensburg, and Lord Mayor Dr. Fabian Geyer spoke at the official welcoming ceremony. Pupils from neighboring schools and the ensemble of the Schleswig-Holstein Symphony Orchestra provided the musical background.

During a walk through the landscaped gardens, WES shareholder Claus Rödding explained the implemented measures to the minister and representatives from Flensburg's top administration. In addition to other public tours, there was also a colorful children's program and a picnic, to which WES invited all project participants and visitors on its own blanket and which was very well received.
